

Vetamac would like to introduce our new SafeSigh manometer non-rebreather bundle.

The kit includes our SafeSigh non-rebreathing circuit and our SafeSigh manometer.

Instructions for use are included in each bundle.

You can now safely sigh/breathe for your smaller patients without the fear of causing trauma due to over-pressurization.

SafeSigh Non-Rebreathing System

Jared Long received his Associate Degree in Veterinary Technology from Brown Mackie College in Fort Wayne, Indiana. He first worked as a kennel assistant when he was 15 and now has 15 years in the veterinary field.

He has experience with large and small animal primary care as well as small animal emergency and specialty care and was on the surgery team at an emergency and specialty hospital in Fort Wayne, IN for 2 years. In 2005, Jared worked at a mixed animal practice where he became a supervisor. He transitioned to the inventory manager position until coming to Vetamac in February 2016 as a service technician/sales associate servicing Northeast Indiana and Eastern Michigan.

A native of Leo, Indiana, Jared now lives in Fort Wayne, Indiana with his husband, Ryan, and their 3 dogs: Booker (Great Dane), Bentley (Great Pyrenees), and Puck (Golden Retriever Mix). He's the second youngest of 5 boys, and he praises his kind and selfless mother as his biggest hero. He is known as the "novelist" due to the detailed notes he takes at work. On a typical Friday night, Jared will be at the lake with friends or enjoying a relaxing glass of wine.

VETAMAC VAPORS

Vetamac Vapors Vol. XIV • Issue 4 • Winter 2018

Who is Team Vetamac?

We are a veterinary anesthesia machine service company, AND we are a family. Vetamac has been in business for over 28 years, and we have forged significant bonds with one another and our clients. We are mothers, daughters, fathers, sons, husbands, wives and friends. We each care deeply about animals and strive to increase patient care by increasing the safety of your anesthetic equipment. We love getting to know you and your clinic family. We love to service, repair, teach and be available for your anesthetic needs. We are your anesthesia machine service family.

Our service technicians have hands on, in-clinic anesthesia training and experience, which sets us apart from the other companies. Vetamac technicians are required to receive rigorous annual continuing education on anesthesia equipment repair. Our technicians also receive field training throughout the year.

Our technicians have a combination of the following degrees and certificates:

- Veterinary Technician (LVT), (CVT), (RVT)
- Certified Biomedical Equipment Technician (CBET)
- Veterinary Technician Specialists in Anesthesia and Analgesia (VTS A&A)
- BS Veterinary Technology, BS Animal Science
- AS Biotechnology, AS Electronics Technology
- Masters in Physiology and Pharmacology

Vetamac is a leader in the veterinary industry for servicing anesthesia machines. We perform all anesthesia equipment maintenance in your clinic.

Vetamac clients include: Animal Clinics, Animal Hospitals, Zoological Societies, Research facilities, Wildlife & Rescue Centers, Humane Societies, Educational facilities, and more. (Jared is pictured volunteering at the Black Pine Animal Sanctuary).

Vetamac recommends annual on-site anesthesia machine service meeting the AAHA, IACUC and AALAS standards. Vetamac provides **Anesthetic Machine Periodic Preventative Maintenance** when we visit a clinic.

Vetamac verifies and tests the following components on the machine: high and low pressure circuits, flowmeter and oxygen flush valve, rebreathing circuit and accessories, non-rebreathing circuit and accessories, gas evacuation system, breathing circuit and one-way valves. We also verify the vaporizer output through the full range of settings and perform a pressure test on both the vaporizer and machine to test for leaks. We carry a large supply of replacement parts for almost all makes of machines. Vetamac also services and repairs ventilators.

Vetamac is a leader in the manufacture of veterinary anesthesia equipment. We manufacture a complete line of veterinary anesthesia machines in the USA. Our trained technicians install and provide a demonstration to your team on the use of the equipment.

Additional Vetamac services include **in-clinic educational seminars** on the use of anesthetic equipment. We also provide **medical gas plumbing hardware**, and **waste gas evacuation systems**.

Everyone at Vetamac would like to thank you for being a part of our family for the past 28 years! Your trust in us has helped us grow from a one-person service company to a company with over 20 employees. We can't thank you enough for that support! We look forward to our continued growth with you and for many more years of servicing your anesthesia equipment.

With the new year, we would like to invite you to browse our new website, vetamac.com. The website now includes a new feature for **online bill pay**. Simply click the green "Pay Invoice" button at the top of the home page to pay your bill anytime! Call our office to set up your online bill pay account.

Please feel free to contact us for any of your anesthesia equipment needs. Thank you for your continued business!
